

# Earth Eyes® Technology" makes your society and your personal life be much richer.

We hope that "earth eyes® technology" is now being developed robots that can coexist with humans as their partners. So we are working on the maximally efficient communication facility based on the five-sense sensors and automatization using AI. Someday, the "days when people are living with robots" will be happened and we not only rely on the intelligence of the robots but also regard them as our friends.

## AI-RoboCamera [earth eyes] lineup

earth eyes ee1-R	Recognizing suspicious behavior [retail shops / facilities] Fully automatic AI system for detection	
earth eyes ee1-R face	Recognizing suspicious behavior [retail shops / facilities] Fully automatic AI system for detection	Face identification
earth eyes ee1-S	Recognizing suspicious behavior [general / outdoor security] Fully automatic AI system for detection	Face identification
earth eyes ee1-HW	Recognizing suspicious behavior [general / outdoor security] Fully automatic AI system for detection	Wireless power supply

\* In addition to the above lineup, we are ready to discuss and consider custom model especially for your life.  
\* Performance will be improved by software upgrade.

## Please feel free to contact us!

Reserve your experience tour of earth eyes in our showroom!

### Please visit the earth eyes showroom!

You can experience earth eyes working in various cases. Please make a reservation for your visit.

## "AI-RoboCamera" protecting you and society always

The next generation of AI technology like no others by changing the basic ideas of security and safety.

Protecting and preventing for our security life

Earth Eyes Co., Ltd.

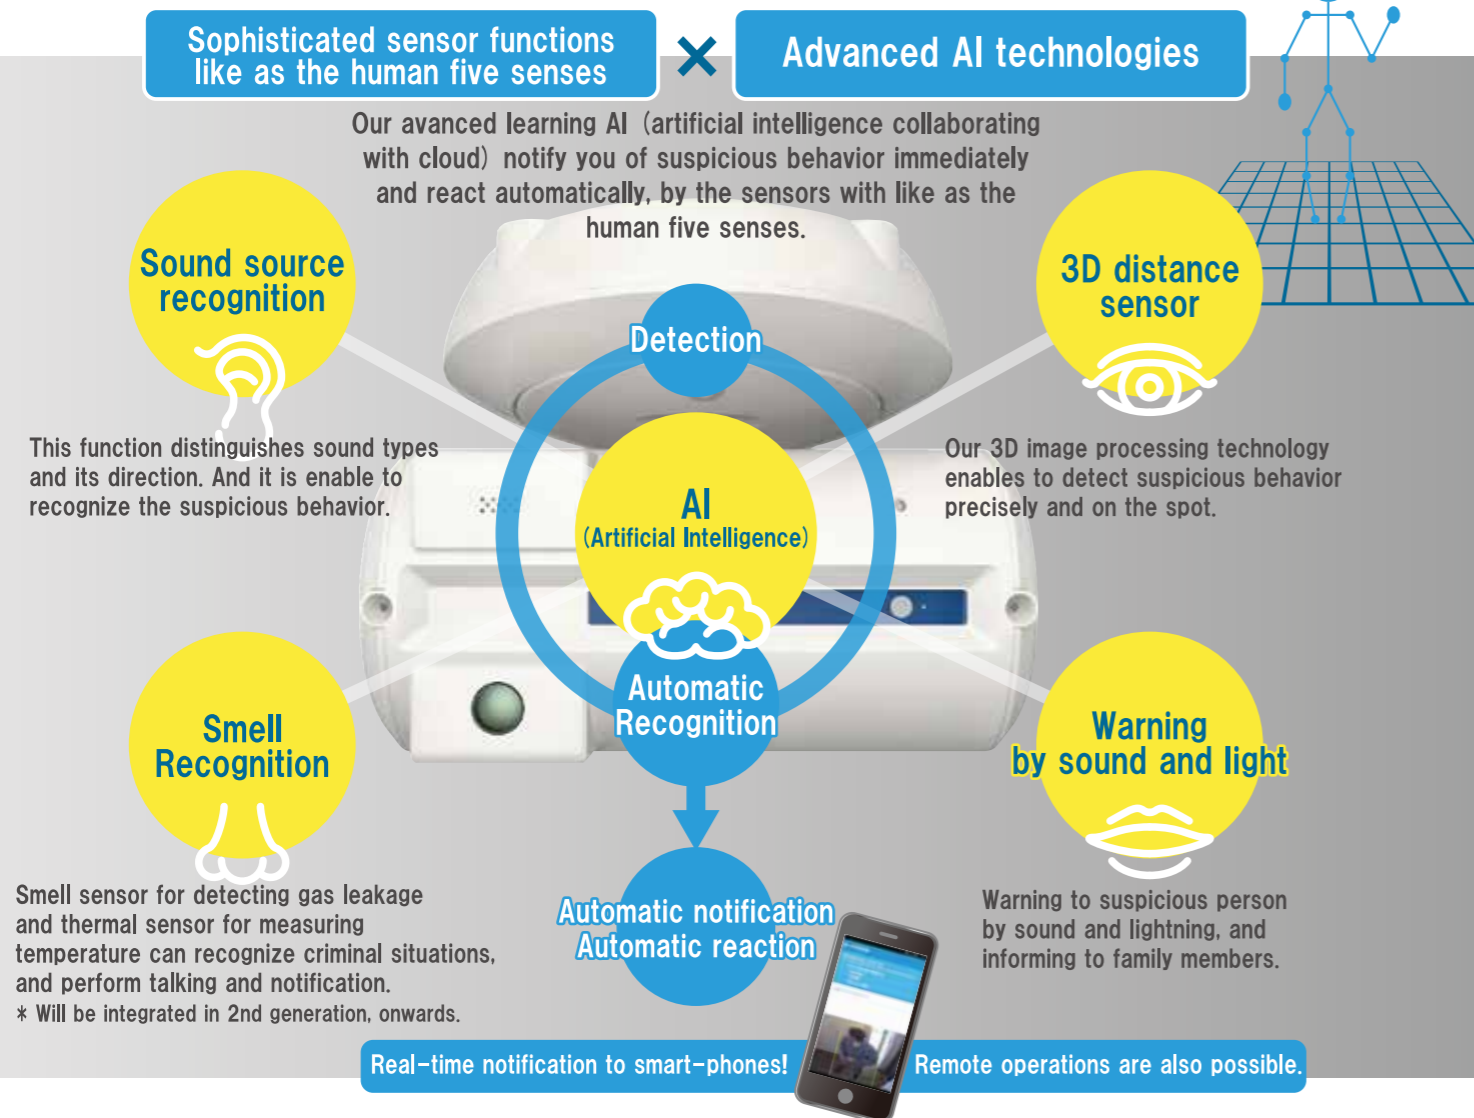

# Sophisticated AI technology, like as the human five senses, makes it possible to prevent crimes and accidents in advance.

The current security system could notify the user of and react on crimes or accidents only after they had happened. Even latest system developed recently can only notify users of suspicious behavior. Users have to take actions by themselves. Earth Eyes, equipped with sophisticated sensing functions close to the human five senses and AI (artificial intelligence) functions enable to predict. This is the World First AI robotics system that can notify user of the suspicious situation in real time and react automatically.

# Earth Eyes technology provide you real security and safety.

Earth eyes system is absolutely new one for security and safety, which nothing can be compared. Earth Eyes protect your houses, retail shops and factory, and so on. It is always monitoring your family. Easy to install, easy to operate.

## Technology & Products

## Security & Safety

**Home security (outdoor)** & **Home security (indoor)** & **Store security (retail shops)**

**Warning to suspicious person automatically**  
Suspicious behavior of thieves and stalkers are immediately recognized and camera react (alarm as warning) automatically, thus preventing crimes. It is also possible to collaborate with security firms (optional: additional cost required)

**Alarming automatically**  
Our system is monitoring your family (baby and elder person) in remote area. Care at home is also monitored. Unexpected situations are recognized and it is prevented by informing to family members.  
\* Will be integrated in 2nd generation, onwards.

**Face identification (such as shoplifter)**  
Recognizing and preventing shoplifting, and monitoring and tracing of suspicious person. Also enable to track customers flow and analyze it. The results of analysis of customer flow can be used for detailed data for retail shop management.

### Excellent functions enable high-level automatization.

3D distance sensor	Image processing	Face identification	Advanced AI technology	Intruder recognition
Sound source recognition	Thermal sensor	Smell sensor	Sound output	Light emission
Ultra-light weight, easy to attach	Screen resolution	Communication facility including mailing	Distinguish person	

■Excellent ■Superior ■Standard ■Poor \* Some functions will be implemented in 2nd generation, onwards.

### Earth Eyes can provide you excellent performance

Earth Eyes system can be operated 24H/7days. Easy to operate and easy to install.

Public facilities	Mega mall	Shops-Business facilities	Offices-Factory
Villa house-Apartment house	Parking	Parks	Regions-Blocks
Hospitals-Care house	Construction area	Agricultural fields	Heritage
