Debut!

Protect human and society
"Five Senses AI Robotic Camera"

Innovation of Health, Safety, Security & Environment
by Five Senses AI & 3D Technology

Contribute to better assurance society with eyes of earth

Earth Eyes Co., Ltd.

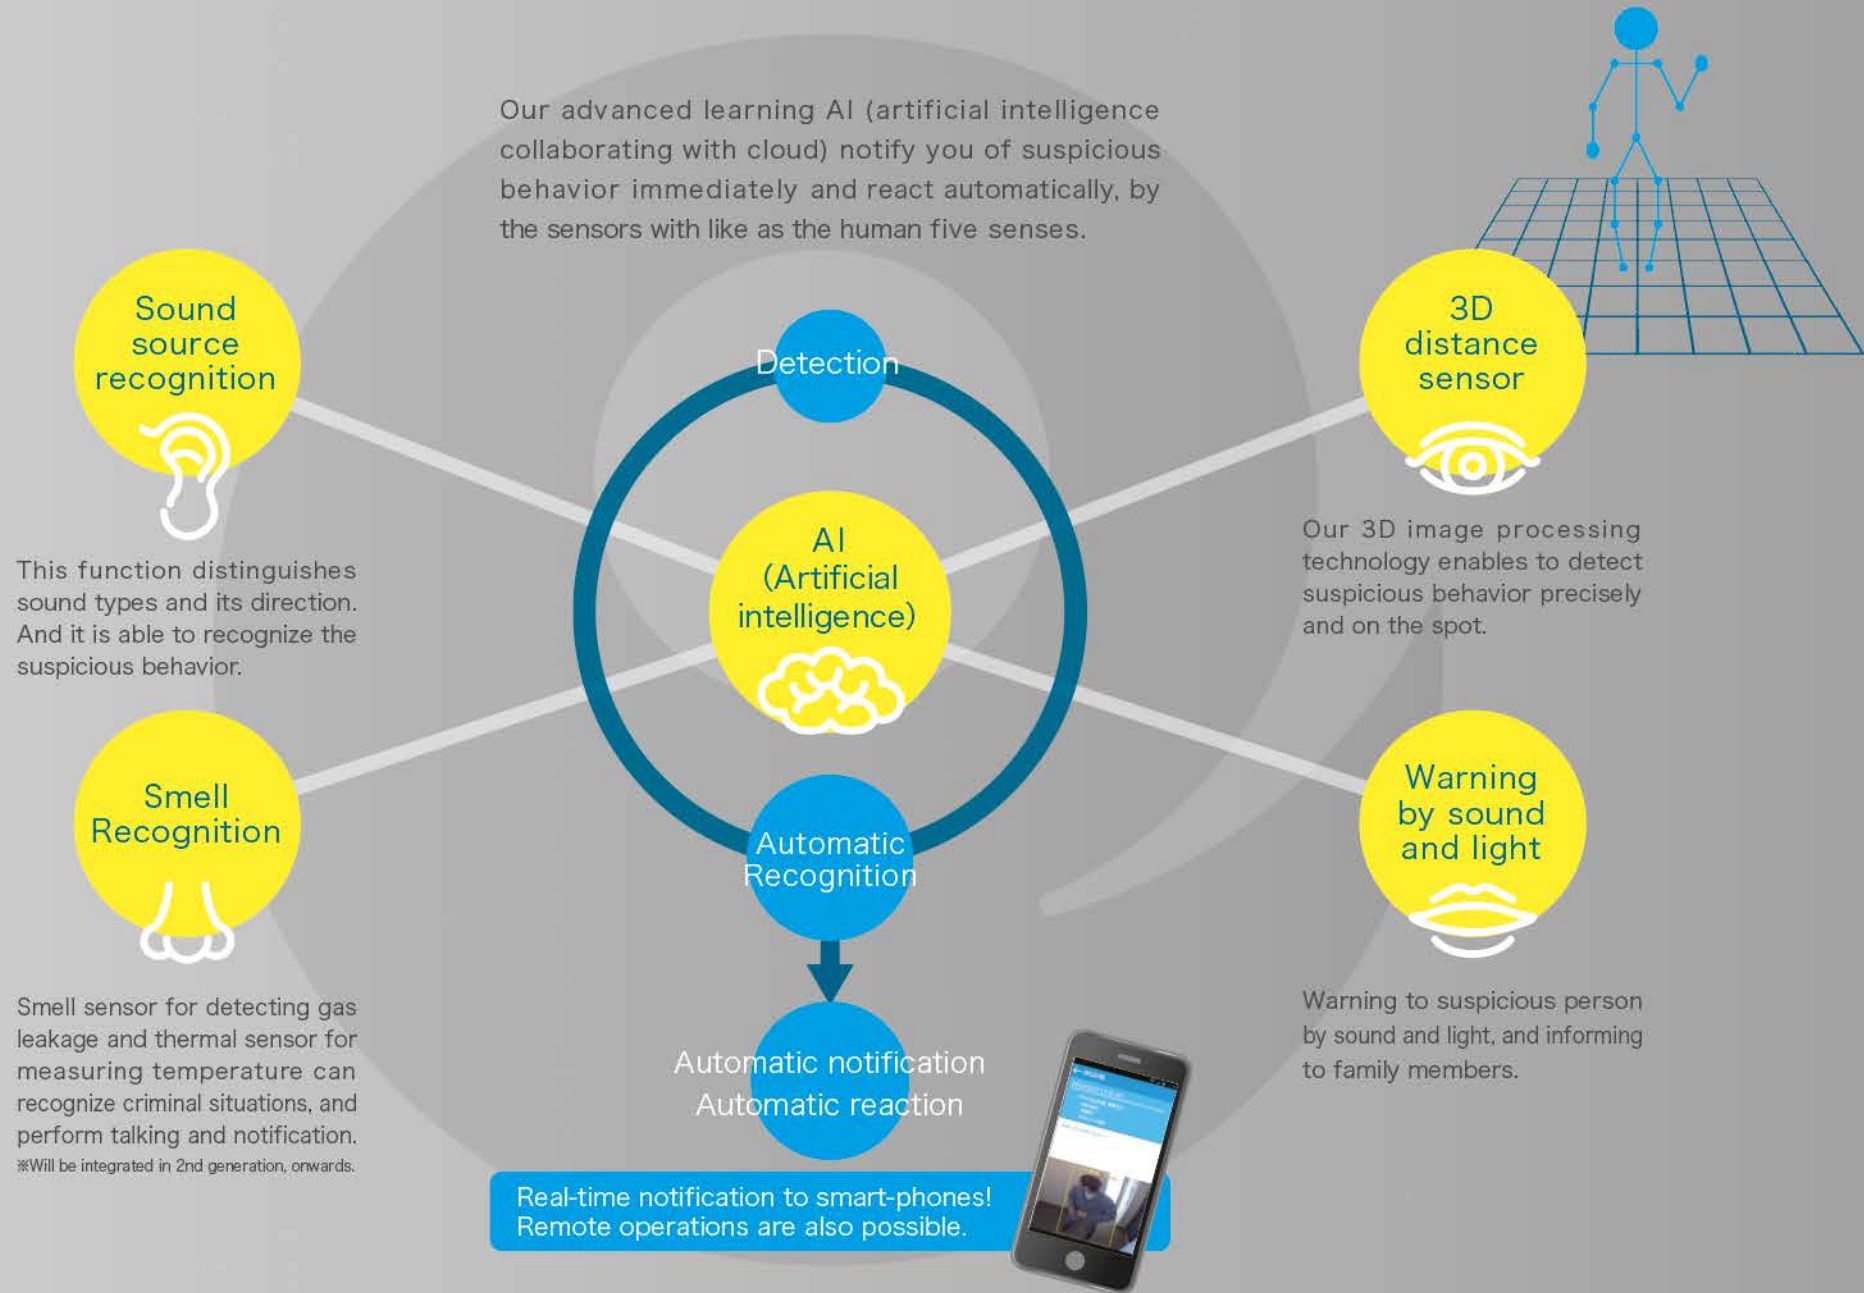

earth eyes technology

Sensing features of human-like five senses and advanced AI can be applied to wide variety of security and prevention needs

The current security system could notify the user of and react on crimes or accidents only after they had happened. Even latest system developed recently can only notify users of suspicious behavior. Users have to take actions by themselves.

Earth Eyes, equipped with sophisticated sensing functions close to the human five senses and AI (artificial intelligence) functions enable to predict. This is the World First AI robotics system that can notify user of the suspicious situation in real time and react automatically.

Shoplifting

Internal Misappropriation

AI Marketing

Solution for Shoplifting Prevention!

Loss from Shoplifting is increasing, counts to 1.41% of sales.
"earth eyes" check-up routine will also contribute to QSC.
The higher Check-up rate will dramatically improve shoplifting prevention and loss reduction.

※JPO Japan Publishing Infra-Center "Survey of Bookstores Shoplifting"

Advanced Technology detects suspicious motions all around the shop and floor!

Comprehensive Solution of Shop Management with Marketing and Operation Support!
